Skilled Software Engineer with 5+ years of professional experience focused on Back-end Development and Cloud technologies. I'm a DevOps enthusiast that works comfortably with the most popular programming languages, specially Golang, Kotlin/Java and Swift, alongside SQL and NoSQL databases. Also a fast learner, highly available and eager to learn new technologies.

SKILLS

Languages	Swift, Kotlin/Java, Golang, PHP, Javascript
Technologies	Docker, Kubernetes, VueJS
Communication	English, Portuguese (native speaker), Spanish (reading and writing)

TECHNICAL EXPERIENCE

Software Engineer / wisk.ai   Set 2020 — Present
Wisk Solutions   *Toronto, Canada*
- Integrated different business partners into the system to reliably exchange data.
- Developed and maintained core functionalities in a microservice-based Swift/Kotlin API.
- Acted as a support developer to troubleshoot and fix a plethora of client issues and requests.

Fullstack Software Engineer / veganbase   Sep 2019 — Aug 2020
Veganbase Ltd   *London, UK*
- Designed and implemented a fully tested and documented microservice-based API of an e-Commerce platform in Golang.
- Successfully integrated the entire platform with business partners and Stripe.
- Implemented and maintained the CI/CD operations of the entire infrastructure.
- Successfully fixed concurrency-related bugs on the web application.

Software Engineer / Payment Solutions   Apr 2018 — Oct 2019
Dock.tech (former Conductor)   *Paraiba, Brazil*
- Developed and maintained RESTful APIs, adding new functionality to the business using many different programming languages, such as Java, .NET and Visual Basic 5.
- Maintained 20 years old legacy systems written in Visual Basic 5.
- Tuned DB queries, functions and stored procedures, improving the performance of batch processes.
- Improved the clearing process of credit card transactions by building a new system using python, leveraging data lakes and machine learning.

Intern Developer   Jan 2013 — Dec 2014
Social Science Department - UFPB   *Paraiba, Brazil*
- Developed a locking application to manage access to computers by overriding Windows SO commands.
- Collected demographic data for the Social Science department.
- Gave support to non-tech students on how to handle different pieces of statistics software and basic programming concepts for macros and other calculations.

EDUCATION

Master of Science in Informatics, *Federal University of Paraiba*   Jul 2021
Bachelor of Science in Computer Science, *Federal University of Paraiba*   Jul 2017
BSc in Computer Science (exchange program), University of West London   2015 — 2016
